Key Features

- Wildly intuitive mechanics of an arcade game with a gut wrenching story, where every choice matters.
- High replayability inspired by rogue-like games, with branching world exploration and random encounters to make each of your many playthroughs a unique experience.
- A challenging gameplay which highlights the core theme of the game - survival at all cost.
- Upgrade your ship and prepare for the challenges ahead
- Expand and upgrade your safe heaven
- Exciting levels which combine the best features of a hand-crafted experience with the diversity of procedurally-generated environment.
- An original mix of graphics where the retro direction meets modern approach.
- Music composed by Marcin Przybyłowicz, known for The Witcher 3: Wild Hunt, which adapts to the gameplay depending on factors like our location in the universe or the game speed.

The Story

When a galaxy-wide war destroys planet after planet, humanity finds itself on the brink of extinction. Scared refugees scatter across the stars looking for safety. Luckily, they find you - a daring space captain, willing to bring them to a safe haven. You'll need to lead them through dark and unknown parts of the galaxy, remnants of long-dead galactic empires, and sectors overrun by alien life forms.

- What awaits you in the deep dark space?
- What do you know about your passengers?
- How many refugees can you save?

An escape from the galaxy-wide war will introduce you into a rich and emotionally charged story, where your every choice as a spaceship captain will reflect on the lives of those under your command. *Full of Stars* is a unique mixture of interactive storytelling and arcade gameplay. You will progress the narrative both by making uneasy decisions in interactive fiction encounters, and by excelling the challenging gameplay and thus unlocking hidden story arcs. Progressing through the story will shed a new light on the main events of the epic tale. Leading a space ship crewed by a haphazard mixture of desperate refugees of very different backgrounds you will have to challenge what you think of gender, race and religion and find a way to start a new and successful society on a new Earth.
